

Material Sampling Technologies Adds Thermal Reduction to Its Processing Capabilities

North Smithfield, RI - April 18, 2011 - Material Sampling Technologies announces completion of its Thermal Reduction Project. The new custom-designed Thermal Reduction Unit will allow for faster processing lead times, added material capabilities, and a more complete array of services to our customers.

“We knew the need for adding Thermal Reduction capabilities was integral to our long term success in the business,” stated Craig Haddad, General Manager. “It’s been a priority from the start of our operations, and we’ve worked diligently to get this project on line as soon as possible. This process adds to our capabilities, thus enabling us to serve more of our clients needs.”
